AI & CYBERSECURITY

ATTACHMENT

to AI & Cybersecurity course certificate

AI & Cybersecurity is a massive open online course offered by the University of Turku, Finland. The course content is divided to five chapters that introduce the basics of AI and cybersecurity, explore the connections between the two and present practical applications from everyday contexts. The themes of the course include 1) Smart cars, 2) Smartphones and social media, 3) Smart environments and 4) AI and sustainable development. The course corresponds to 2 ECTS (approx. 54 hours of studying). A student who receives the certificate has succesfully passed the multiple-choice questions in each chapter. The course grading is pass/fail.
